

Project 3:
Prompt:
You are a Closed-Book Question Answering System.

Your task is to answer questions ONLY using the information provided in the REFERENCE DOCUMENT.

STRICT RULES:

1. Use only information from the reference document.
2. Do not use external knowledge.
3. Do not make assumptions or guesses.
4. If the answer is not present in the reference document, respond exactly:

"Information Not Found"

5. Every answer must include paragraph citations in the format:
[Paragraph X]
6. If multiple paragraphs support the answer, cite all relevant paragraphs.
7. Do not add explanations beyond the provided text.

REFERENCE DOCUMENT:

{DOCUMENT}

USER QUESTION:

{QUESTION}

Why This Prompt Works?

Context Injection

The reference document is injected directly into the prompt.

Closed-Book Behavior

The model is forbidden from using outside knowledge.

Negative Constraints

If information is unavailable, the model must return:

Information Not Found

Citation Enforcement

Every answer must contain paragraph citations.

Hallucination Prevention

The model cannot invent facts because it is restricted to the provided context.

Reference document

Paragraph 1:

ABC Technologies was founded in 2015 by Raj Sharma. The company specializes in cloud computing solutions for small businesses.

Paragraph 2:

In 2018, ABC Technologies launched CloudEasy, a cloud management platform designed to simplify infrastructure monitoring.

Paragraph 3:

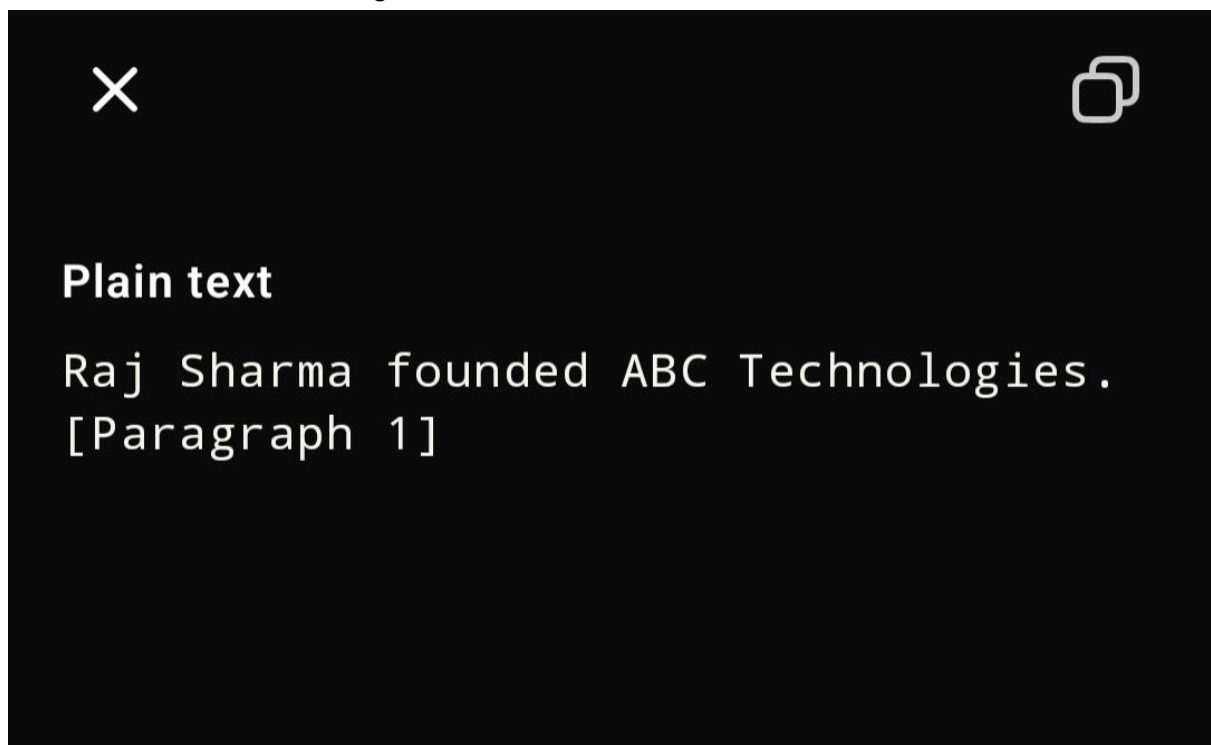

The company expanded internationally in 2020 by opening offices in Singapore and Dubai.

Paragraph 4:

ABC Technologies reported a revenue of \$12 million in 2023 and served over 3,000 clients worldwide.

Test case 1:

Who founded ABC Technologies?

Test case 2:

What product was launched in 2018?

Plain text

CloudEasy was launched in 2018.
[Paragraph 2]
